

# SignNow: e-signatures are just the beginning

## Electronic signatures that scale with your workflow

Signnow offers an award-winning e-signature solution which is used by millions of people worldwide to edit, sign and send for e-signing documents on any device, desktop or mobile. According to G2 survey data, users rate SignNow ahead of competitors (over 90% of approval rates) in such key categories as **Secure Authentication, Workflow Setup, Regulatory Compliance, Performance & Reliability.**

I use SignNow for every job position that I recruit for. As soon as I get a new job order I prepare a job description and my next step is to set up my template group in SignNow for potential candidates to fill out and sign. Each group will contain a qualifications form, a right to represent form, and a rate worksheet. This process used to take me an hour but thanks to SignNow, it only takes 5 minutes to prepare!

- Slack

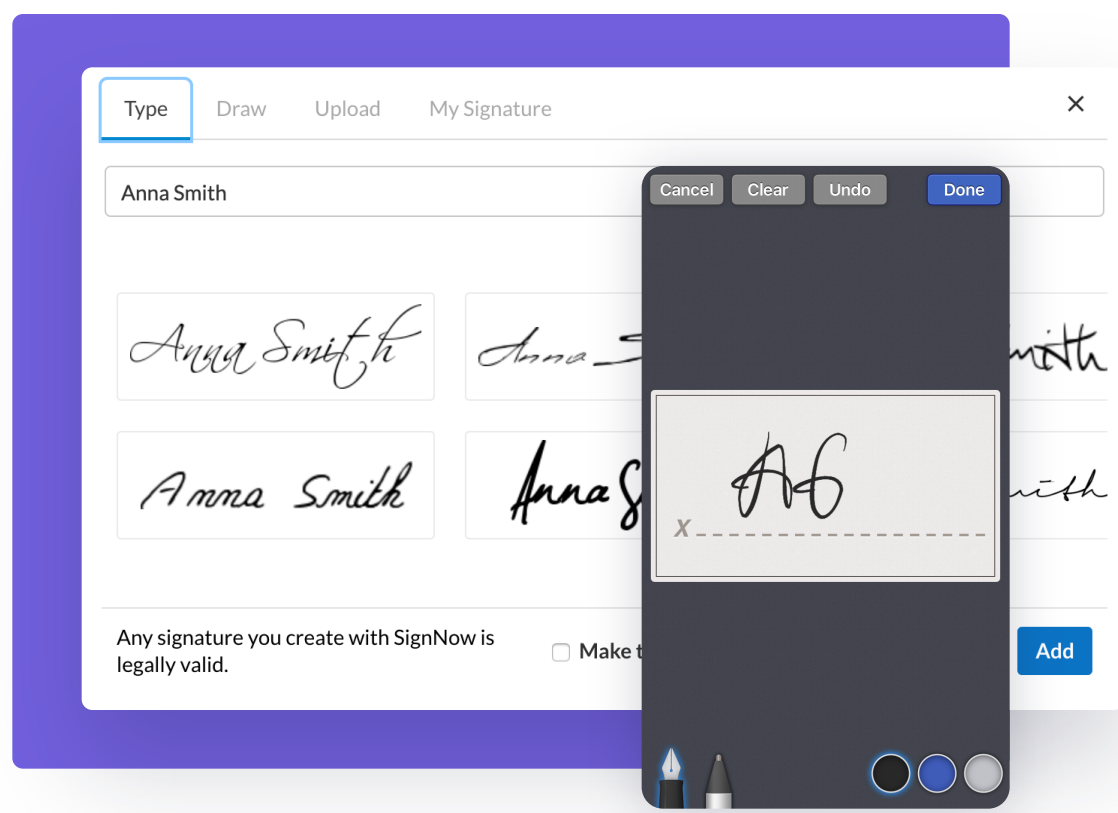

Signnow is much more than just convenient e-signing – it also offers a set of flexibly configurable tools designed to make your daily workflow more efficient and your teamwork comfortable for all sides involved.

## Key benefits of SignNow workflows

### Work interrupted

SignNow's desktop solution is instantly synced with the mobile app. You can start editing documents in your office and finish your work on a mobile device, even if you are offline. All data is securely stored in a private cloud.

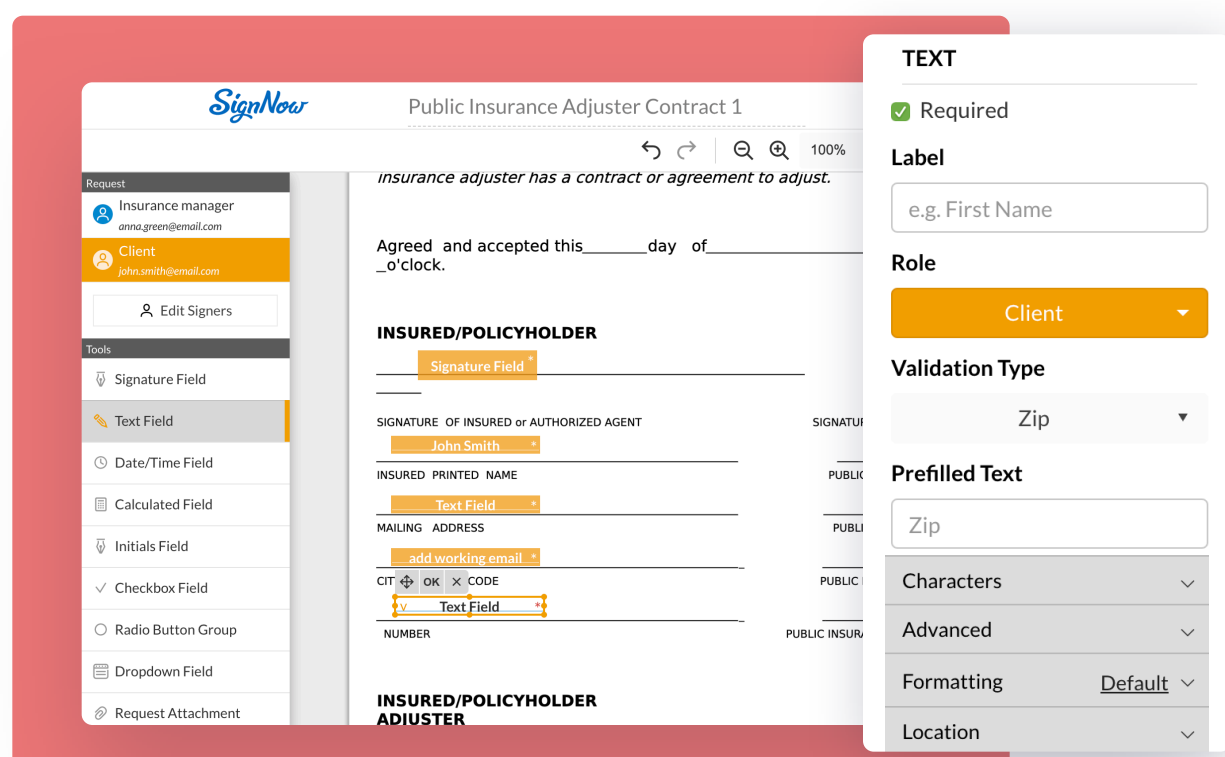

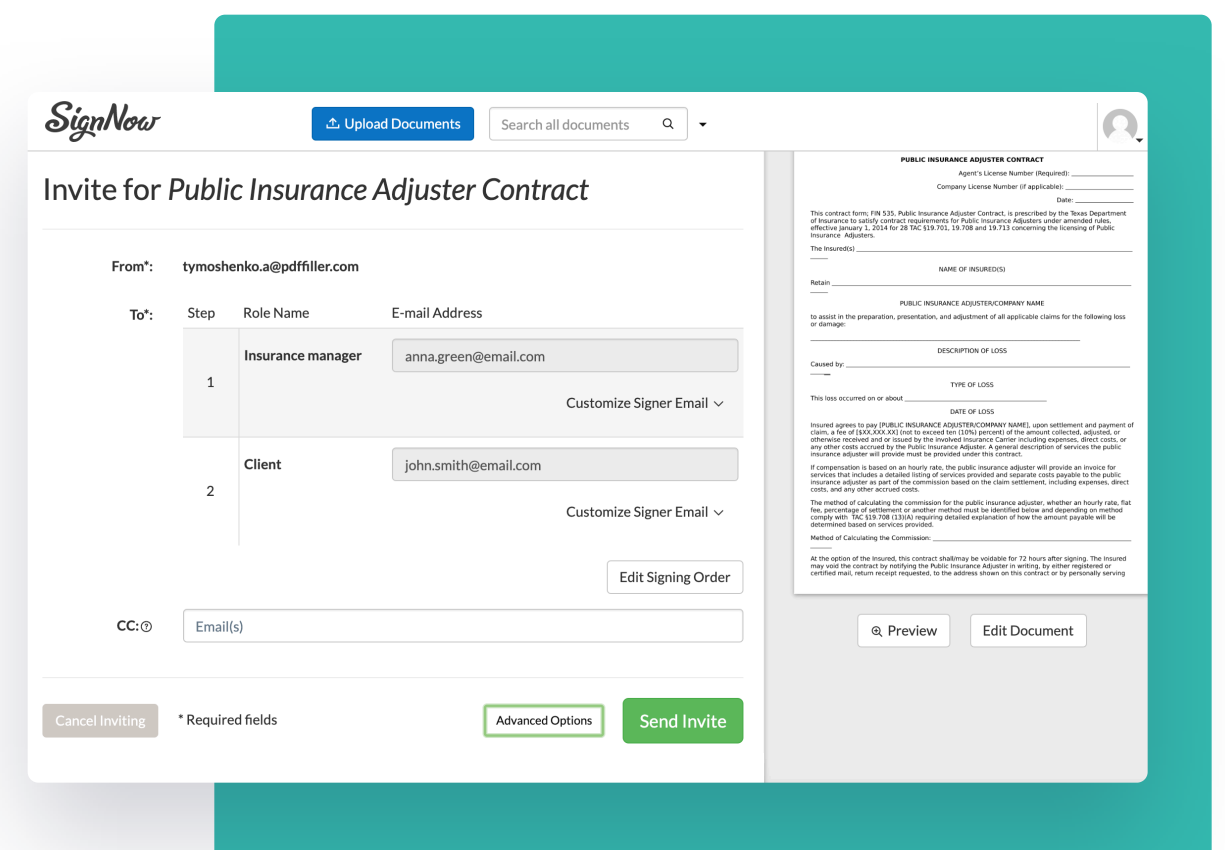

## E-sign at your convenience

You can draw a signature on the screen of your mobile device, type in your name or upload the image of your signature from your phone or computer.

## Simplify complex workflows

Arrange signing order in several steps for as many signers as you need. You can also enable/disable document forwarding, preset reminders, set expiration dates and passwords for confidential documents.

## Facilitate e-signing on the client's side

Automated guidance will make e-signing easy even for inexperienced users. You can label fields with short instructions for extra clarity. If you preset fields as required, rest assured none of the fields could be skipped by signers.

I would highly recommend SignNow for all businesses that deal with clients who have little time to come to the office and physically sign documents - and also for the clients who want to expedite processing of all documents that require signatures.
