DLT Cloud Navigator™

DLT / Cloud Checkr

NAVIGATE TO THE CLOUD

As more organizations transform their business by leveraging the cloud, it can become a challenge to maintain visibility, actionable intelligence, automation, and accountability across their investments. Under the AWS Value Added Distribution Program, DLT has partnered with CloudCheckr, a leading comprehensive cloud management platform, to develop a license model specifically built and designed with the Cloud partner in mind.

Under this unique agreement, DLT worked closely with CloudCheckr to co-develop a license model that can be utilized in one of two formats: Basic+ or Premium. By choosing DLT as your AWS Public Sector Distributor, Basic+ will be provided free of charge.

ONE DASHBOARD CLOUD MANAGEMENT

COST MANAGEMENT

CloudCheckr provides cost allocation, spend optimization, invoicing and chargebacks. Custom reports and alerts ensure governance and accountability as environments scale.

SECURITY & COMPLIANCE

Total visibility across cloud infrastructure enables protection for state and activity monitoring, turning insight to action while meeting compliance demands.

ASSET INVENTORY

Cross-account dashboards provide sophisticated reporting for enterprise-wide inventory based on tags, geography, function and more to proactively optimize workloads.

RESOURCE UTILIZATION

CloudCheckr provides summary and detailed usage statistics for resources across AWS, Azure, and Google Cloud, offering actionable intelligence to right-size and scale services efficiently.

AUTOMATION

CloudCheckr enables users to save money, time, and effort to increase operational efficiencies with automated actions for your cloud.
